

TitleLink™ Disaster Recovery and Data Protection Services

TitleLink understands your title plant is your most valuable asset. Our Disaster Recovery and Data Protection Services secure your data and its integrity while protecting your business from interruptions due to unforeseen events.

Reliability in an Unreliable World

TitleLink Disaster Recovery and Data Protection Services are included in TitleLink Cloud and available for an affordable monthly fee for TitleLink Local customers.

All data and work products are backed up

- SQL database
- Archival
 - Documents
 - Images
- Project Folders
- TitleLink Application Data
 - TitleLink Application
 - Settings

Three-tier back up

- Nightly On-Line Backup
 - All customer data is backed up as true replicas and can be swapped automatically in case of drive or hardware failure.
- Nightly Near-Line Backups
 - Near-Line Backups provide the ability to replace the previous 48 hours of data in response to malware attack.
- Nightly Off-Site Backups
 - These backups enable the restoration of data from any time in the previous two weeks or any month-end for up to 1 year.

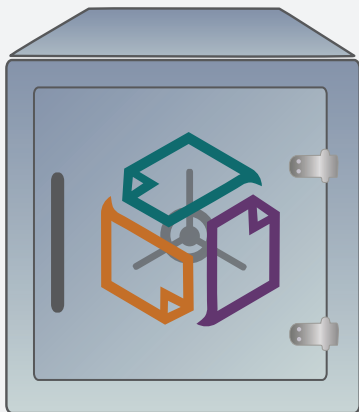

Always Have a Spare

- Fail Over for Disaster Recovery
 - Nightly replication of all data to a redundant live production environment
 - Located in graphically separate data center.
 - Can be operational and accessed in under 4 hours in response to a disaster or unexpected business interruption that is more than 4 hours in duration.

Just in Case

- Archival Disaster Recovery
 - All archived documents and databases are backed up to a third data center in a different geographic location.
 - Documents and databases can be restored within 48 hours.

Going the Extra Mile for Maximum Peace of Mind

TitleLink employs the latest industry best practices and state-of-the-art, fully fault-tolerant data centers.

- All hardware is redundant with automatic fail over
- Systems and networks are monitored 24/7
- Multiple carrier grade connections to the Internet
- Back up power keeps the data center operational for long periods without grid service
- Total fire suppression
- Multiple inland geographic data center location minimize exposure to natural disasters.
